

# Using TracBack on a Colorado Series Device

---

On the Colorado series handheld devices, a Tracback can only be performed using the current track log. If a saved or archived track is chosen, the Tracback option will not appear.

To perform a TracBack on the Colorado series:

1. Access the Shortcut Menu
2. Select **Where To**
3. Select **Tracks**
4. Select **Current Track**
5. Press **Enter** when the Green TracBack button appears
6. Begin Navigation

Your device will now navigate back along the previously recorded track. Both the Compass and Map page can be utilized in following the track.
