## Using the TracBack Feature

The TracBack feature allows you to return along a traveled path (or another Rino user's path) without marking any waypoints. When you are ready to return to where you started, the Rino 520/530 takes you back by following the Track Log that you left behind. You can save a total of 20 tracks in the unit memory. The Track Log starts recording as soon as the unit gets a satellite location fix and the Track Log feature is turned on. When you no longer need a Track Log you can press the on-screen **Clear** button to remove it.

If you want to keep a record of a certain track log or use the TracBack feature, it is recommended that you clear the Track Log before you start traveling. The percentage of memory used by the current track log is displayed in a window at the top of the page. After the Track Log is Cleared, it displays zero percent.
